

Whole of society resilience in Innlandet County with a special focus on food security

Erik Lagethon, Head of Section,
Department of Regional Planning and Economic Development

Norways largest agricultural county

Forestry Leadership

Innlandet is Norway's largest forestry county, with complete valuechains and a strong timber production industry.

Crop Production

The county is Norway's second largest producer of grain.

Livestock Farming

Innlandet leads in beef production and ranks third in milk production, supporting a robust dairy and meat industry.

Sustainability and Innovation

The region emphasizes sustainable practices, technological advances, and integrated bioenergy solutions to ensure resilience.

AGRICULTURE AS A DRIVER OF SUSTAINABLE GROWTH IN INNLANDET

Economic and Employment Impact

Agriculture in Innlandet contributes over NOK 13 billion annually and employs about 9 percent of the county's workforce.

Land and Forest Resources

Innlandet holds 20 percent of Norway's agricultural land and 30 percent of its forests, vital for farming and forestry industries.

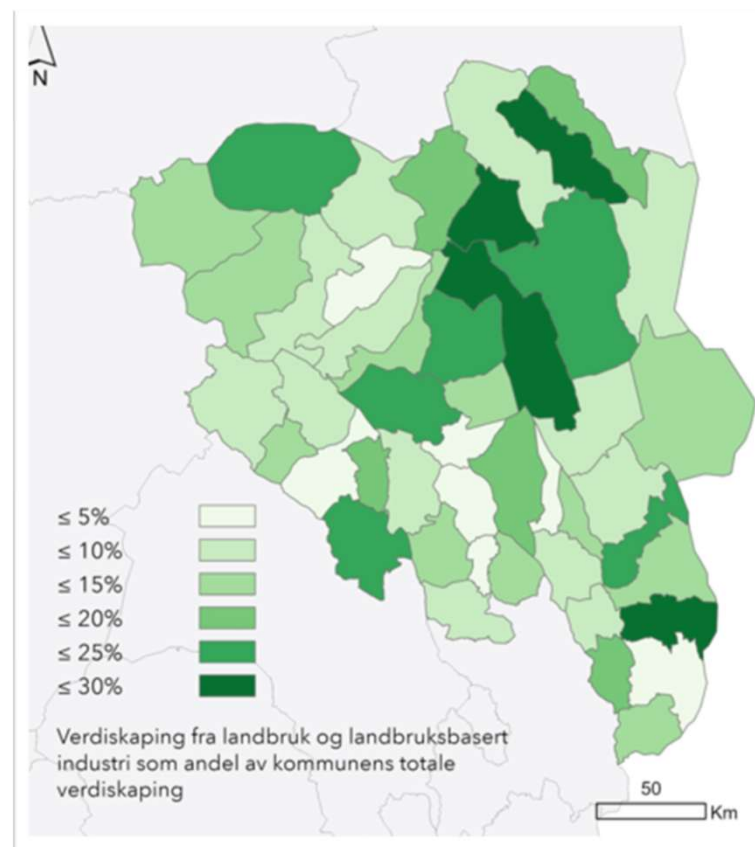

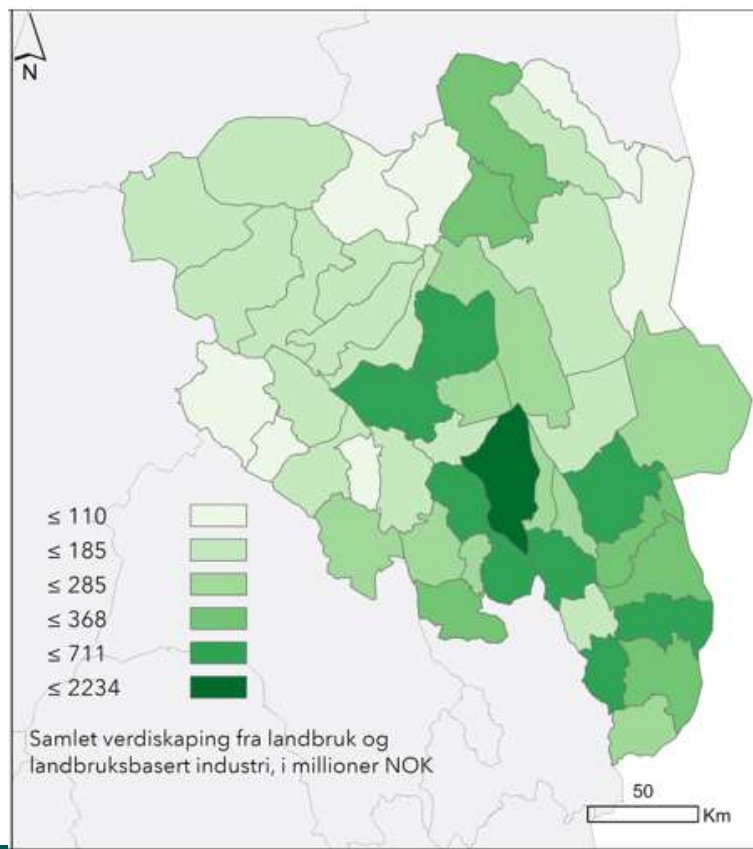

Sustainable Rural Development

Agriculture supports rural communities, food security, and integrates with tourism and bio-based industries for sustainable growth.

Food production as part of total defense

National pilot to ensure healthy, sustainable and energy-rich food for citizens and the defense!

Background

- The geo-political situation
- Focus on preparedness and self-sufficiency
- Growing military presence
- Ensuring that civilian society functions in times of crisis or war.

NATO 7 baseline requirements

1. Assured **continuity of government** and critical government services
2. Resilient **energy supplies**
3. Ability to deal effectively with the **uncontrolled movement of people**
4. **Resilient food and water resources**
5. Ability to deal with **mass casualties and disruptive health crises**
6. Resilient **civil communications**
7. Resilient **transport systems**

Pilot: Food production as part of total defense

Main goal

- The project will result in a methodology for increased and more robust food preparedness in Innlandet, with transfer value nationally.
- The project will contribute to reducing vulnerabilities in the value chain from producer to consumer
- The project will result in the Armed Forces having a framework of regulations for public procurement, motivation and knowledge that makes it possible to purchase norwegian and regional food.
